CFPA Lunch Meeting

Presentation: **Antifreeze Use in Fire Sprinkler Systems, Where We Stand Currently and How We Got Here**

Come join us at the Colorado Fire Protection Association meeting at the West Metro Fire Rescue Training and Events Center, on Wednesday, September 21st, starting at 11:45 AM. Lunch will be provided.

Presentation Topic:

In 2010 NFPA issued a safety alert and TIA regarding the use of antifreeze solutions in fire sprinkler systems after a fatality occurred as a result of sprinkler discharge on to a grease fire with very high concentration of antifreeze. The TIA and subsequent NFPA standard updates limited the concentration of new antifreeze and required listed antifreeze in new installations with a sunset date of September 30, 2022 to replace all existing antifreeze solutions with listed antifreeze. Twelve years after the initial TIA, the industry has made progress with several new UL approved antifreeze products being approved but there are many challenges that remain. With the sunset date fast approaching this presentation will take a look at how we got to this point and what options and best practices are available, specific to Colorado, for new antifreeze systems and replacement antifreeze in existing systems.

Nominations for the 2023 CFPA Board will also be discussed at this meeting

Presenter:

Robert Merlino, P.E. – Western States Fire Protection & Current CFPA Board President

The cost to attend in-person is:

Non-Members: \$50/person pre-paid
Members: \$25/person pre-paid (With 2022 New/Renewal Membership Paid)
AHJ Members: \$20/person pre-paid

The cost to attend virtually is:

Non-Members: \$20/person pre-paid
Members/AHJ: \$10/person pre-paid (With 2022 New/Renewal Membership Paid)

September Meeting RSVP/Payment: [September 2022 Meeting Registration](#)
Membership details can be found here: [CFPA Membership](#)

SPACE IS LIMITED – RSVP REQUIRED

CFPA is an ICC Preferred Provider and 0.1 CEUs will be provided to all event attendees
